

Creating a Cover for the Card Book

1. Take two 4"x6" canvas panels and use a corner rounder to round to make the corners round.

2. Put the two canvas panels back to back and drill a hole in the end where you want to attach the screw pin.

3. For the cover, use white glue or a glue gun to attach poster board shapes and/or letters to the front cover.

4. Create a mixture of one part powdered graphite, one part denatured alcohol, and one part shellac. Paint this mixture onto the cover and let dry. You may need several coats of the mixture.

5. Use colored pencil or other drawing media to add color/words/designs to the cover.
