

Foil Embossed Card

Materials

4" x 6" poster board
poster board scraps
scissors / knife
pencil
black paste shoe polish
white glue
spray glue
heavyweight aluminum foil

Procedure

1. Cut different shapes, either geometric or freeform, out of the scrap poster board.
2. Using the 4 x 6 poster board as the card base, glue the shapes onto the card.
3. Layer the shapes until you have 2 layers glued on the card.
4. Spray glue onto the completed layered card and place it face side down onto the dull side of a piece of heavyweight aluminum foil.
5. Turn the card, face side up, and begin rubbing on the foil to define the shapes and get rid of the wrinkles.
6. Use a pencil to create lines and patterns on top of and around the shapes. Press hard to create an impression in the foil.
7. Rub black paste shoe polish onto the foil design. Let it dry for about 5 minutes and then wipe off the excess shoe polish
