

Flipping Boxes

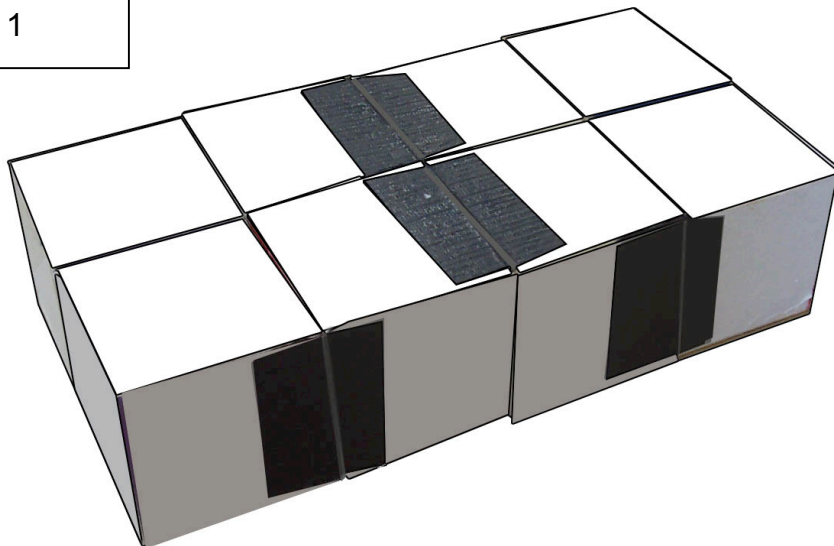

Materials

- 8 Boxes (pre-made or make your own)
- Duct tape
- Scissors

Directions

1. Construct or gather 8 cubes (boxes) of the same dimensions.
2. Using the duct tape, hinge the cubes together as shown below.
The position of the hinges is important for the “flipping” to work. After the boxes are taped together, flip them and put tape on the “other side” where the tape has been applied.
