

# SPACKLE PAPER

## Materials

- Heavyweight paper, cardboard, mat board
- Spackle compound or acrylic modeling paste (for a finer, base texture)
- Putty knife, palette knife, spatula

## Directions:

1. Using your knives or spatula, spread a thin layer of spackle or acrylic modeling paste over the surface.
2. You may place items on your paper before applying the compound.
3. You may add texture, draw into it, or smooth the surface by brushing the surface with water.
4. After the surface has dried, you can sand it, rub color into it, or paint it.

You may also coat the surface with gel medium for a shiny texture.
