

# Pierced Paper

## Materials

- Tracing wheel (available at sewing stores)
- Large needle, knitting needles, hole punches used for leather tooling or other pointed tools to pierce paper
- Variety of paper
- Scrap cardboard or mat board surface or self-healing cutting mat (optional)

## Directions

1. Taking the tracing wheel, create a design by running the wheel across the paper several times.
2. For a more pronounced texture, you can pierce the paper using a large sewing needle or tool to pierce the paper.
3. You may randomly pierce the paper or draw a design on the back of your paper and pierce following the design.
