

gel medium image transfer using ink-jet printer

Materials

- Gel medium, Elmer's glue, Mod Podge
- Ink-jet print of an image or ink-jet transparency
- Base paper to apply image
- Brush
- Burnishing tool, bone folder, or wooden spoon

Directions

1. Apply gel medium with a brush to your printed image.
2. Place the image (while still wet) face down on your base paper and rub with the burnishing tool, bone folder, or wooden spoon.
3. Lift paper and image will remain.
4. Using the printed transparency will produce a clearer image.
